An Innovative and Personalized Approach to Cybersecurity
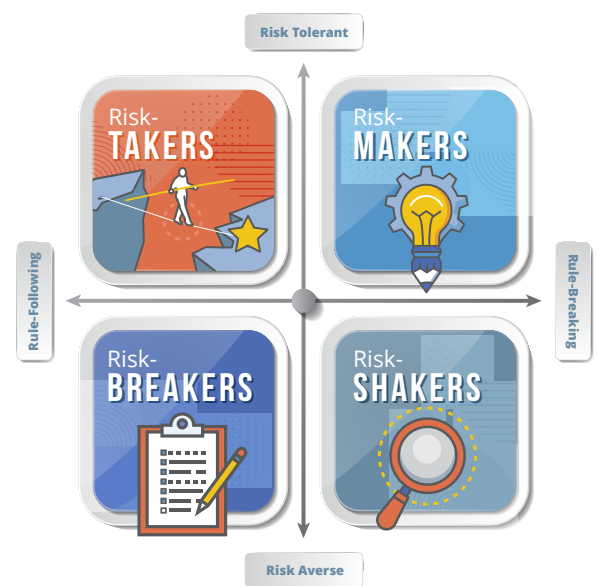

Empower Your Students With Digital Wisdom To Be Safer Online.

Breakthrough Cybersecurity Awareness Education for Students

Today's students are more at risk online than any previous generation. Youth often seem immune to the critical idea that their digital footprint begins to grow from the very moment they independently explore online. That's where we come in. **We align our curriculum to the essence of digital citizenship, information literacy and personal cybersecurity.**

my**Q** Student Edition

- The learning journey begins with our **myQ Style Assessment**, which helps students understand how their personality drives their online instincts and impulses and helps promote self-awareness

- Our four-quadrant behavioral model deepens student engagement and encourages deeper application of learning with our style-aligned, personalized and curated content
